

Submitted Information:

Puppy's Kennel Name

Maggie

Litter

Coffeehouse Litter

d.o.b.

7-22-22

Evaluation Date

9-13-22

Evaluator

Abigail Whitahauer

Location

Pelham, AL Roverchase

Assertiveness - People (The degree to which a puppy is bold and self-assured with familiar and unfamiliar people)

2=Middle of the Road (Initially greets tester low but with encouragement gets into lap but never approaches tester's face; may be more assertive with familiar people)

Notes (optional)

Assertiveness - Dogs (The degree to which a puppy is bold and self-assured with familiar and unfamiliar dogs)

3=Forward (Lacking restraint; presumptuous, bold with both familiar and unfamiliar dogs, e.g., greets by climbing on back, head, or neck)

Notes (Optional)

N/A for this eval but very bold with other dogs at home

Biddability (The degree to which the puppy shows an interest in working with and/or understanding tester)

2=moderately biddable (attempts to work with and/or understand tester's words and motions about half the time; gets frustrated or distracted sometimes)

Notes (optional)

Very independent and a bit aloof but would engage eventually with evaluator though not always with objects and specified activities

Courage (Mental strength to persevere despite fear or difficulty)

3=Extremely courageous (independently perseveres through every frightening and difficult situation)

Notes (optional)_1

Energy Level (capacity and need for vigorous physical and mental activity)

2=Moderate Energy (trots most of test, may stop moving a few times)

Notes (optional)_2

Environmental Focus (The need to concentrate attention or energy on surroundings)

2=Moderate Environment Focus (Notices environment but is easily redirected)

Notes (optional)_3

Forgiveness (Reaction to unwarranted adverse behavior or negative emotion from a person)

3=Extremely forgiving (Immediately turns toward and touches tester or gets in tester's lap)

Notes (optional)_4

Handshyness (Puppy's reaction to a standing person reaching over its head to pet it ... note: most pugs hate this)

2=No reaction (no reaction to overhead reach)

Notes (optional)_5

Did not do this test though most pugs do not like over the head pets possibly due to the positioning of their eyes.

Pain Threshold - 1st Front Paw (The lowest level of pain which a puppy reacts to when the webbing between the two middle toes is pinched with fingers, with consistently increasing pressure, 0 being no pressure and 10 being the most pressure the tester can apply)

10=Extremely Pain Tolerant

Notes (optional)_6

Pain Threshold - Average score

10

Self-Confidence (Assurance; confidence in its own judgement, power, and abilities)

3=Very Confident (Relaxed, eager, no fear or hesitation, always upright body carriage and forward movement)

Notes (optional)_7

What, if anything, concerned the puppy?

new environment - very aloof and surveyed the lay of the land

Stress Type (Responds to stress with increased or decreased activity)

2=Middle of the Road (No real change in the puppy's activity under stress)

Notes (optional)_8

Learning Speed (Speed with which puppy learns to solve a problem. Note: it is the change in speed, if any, between the 1st and 2nd attempts that indicates how quickly a puppy learns.)

10=Fast (During the 2nd attempt, the puppy finds breeder 50% or faster than the first time (if physically possible)

Notes (optional)_9

very fast study in training at home

Patience (The extent to which the puppy calmly waits during periods of inactivity)

2=Moderately Patient (Remains in general vicinity of tester, may attempt to reengage tester, may eventually leave)

Notes (optional)_10

Problem Solving Style (Manner in which puppy approaches solving difficult problems) - Check all traits that apply. Thoughtful

1

Problem Solving Style (Manner in which puppy approaches solving difficult problems) - Check all traits that apply. Disinterested

1

Problem Solving Style (Manner in which puppy approaches solving difficult problems) - Check all traits that apply. Focused

1

Problem Solving Style (Manner in which puppy approaches solving difficult problems) - Check all traits that apply. Calm

1

Problem Solving Style (Manner in which puppy approaches solving difficult problems) - Check all traits that apply. Thinks before acting

1

Notes (optional)_11

Resilience (Ability to recover from or adjust easily to change or stress)

2=Moderately Resilient (Recovered from stress with encouragement and support from tester)

Notes (optional)_12

Sight Sensitivity (Degree of puppy's reaction to the introduction of an unusual visual object)

2=Middle of the Road (Startles and approaches object only with encouragement)

Notes (optional)_13

Sound Sensitivity (Degree of puppy's reaction to a loud, unexpected noise)

2=Middle of the Road (startles and approaches object only with encouragement)

Notes (optional)_14

very appropriate recovery from startle response umbrella and tin drop and all funky toys

Stability (The consistency and appropriateness of a puppy's behaviors while under stress)

2=Moderately Stable (Somewhat dependable under stressful circumstances; may exhibit some inappropriate behaviors while under stress)

Notes (optional)_15

Stress Level (Amount of mental or emotional strain or tension exhibited during the test)

2=Moderately Stressed (Shows some mild stress indications e.g. whining, panting, trying to escape, lip licking, whale eye, scratching, yawning)

Notes (optional)_16

Dog Focus (The need to concentrate attention or energy on visible dogs)

2=Moderate Dog Focus (Greet dog but is easily redirected)

Notes (optional)_17

N/A did not include this in the evaluation but based upon other interactions no fear of other dogs but sometimes more aloof with them

Eye Contact (The natural tendency to look people in the eye)

2=Moderate Eye Contact (Puppy makes eye contact 5-6 times during test)

Notes (optional)_18

Following (The natural tendency to move with and close to a human's legs)

2=Moderate Following (the puppy moves in along with tester but may get distracted by the environment)

Notes (optional)_19

Object Focus (The need to concentrate attention or energy on objects)

2=Moderate Object Focus (Notices objects but is easily redirected)

Notes (optional)_20

People Focus (Pack Drive) (Amount of intensity and desire for a connection)

with people; sociability)

2=Moderate Pack Desire (Engages tester when encouraged)

Notes (optional)_21

Scent Focus (The need to concentrate attention or energy on scents)

2=Moderate scent focus (Notices scents but is easily redirected)

Notes (optional)_22

Activity Focus (Ability to concentrate attention or energy on an activity)

2=Moderate Activity Focus (Can concentrate on task or activity but is easily distracted)

Notes (optional)_23

Food Desire (Level of need and intensity to get food)

3=High Food Desire (Eagerly and intensely persists in getting food)

Notes (optional)_24

Play Desire (Level of need and intensity to engage with another in games, such as chase and/or tug-a-war)

2=Moderate Play Desire (Will chase, pounce, or hold, but does not play consistently)

Notes (optional)_25

Retrieve Desire (Level of need and intensity to chase, grab, hold, and return an item to a person)

2=Moderate Retrieve Desire (Chases items about half the time, may or may not return with item to tester)

Notes (optional)_26

Ranking Desires (Relative strength of food, play, and retrieve desires) - Strongest Desire(s).Food

1

Ranking Desires - 2nd Strongest Desire(s).Play

1

Ranking Desires = weakest Desire(s).Retrieve

1

Switching between desires (Ability to stop pursuing one desire for another, when presented)

2=Switches desires (Moves from one desire to another with a lot of encouragement and/or effort on tester's part)

Notes (optional)_27

This puppy is best suited for the following homes according to its temperament:.Family Pet (Quiet Home)

1

This puppy is best suited for the following homes according to its temperament:.Family Pet (Average Home)

1

This puppy is best suited for the following homes according to its temperament:.Conformation

1

This puppy is best suited for the following homes according to its temperament:.Therapy Dog

1

Notes (optional)_28

Very independent puppy.

Training Notes for this Pup based upon Temperament Evaluation:

Make her perform a task for every treat or attention earned. The way to the treat is through the human ;)

Comment

Beautiful puppy - gorgeous head and conformation. Very smart. Would do best with a more experienced trainer or someone who has owned pugs.
